START MEMO NOMINATING-JUSTIFICATION:
David Neufeld is manager for the Water Planning Policy Branch, at the Ontario Ministry of the Environment. Water management is an important topic in the Canada-U.S. dialogue that is only going to be increasing in importance. In a November 2004 report, Adele Hurley, Munk Centre, University of Toronto, ("Rising Tensions: Canada/U.S. Cross Border Water Issues in the 21st Century") suggests the two countries have enjoyed much cooperation on environmental management, however, with the U.S. planning to proceed with the Devils Lake diversion as well as the ongoing border closure to Canadian animals, conflicts over water will likely increase in the years ahead.
Mr. Neufeld's IVLP would give him first-hand insights into U.S. points of view, research and the policymaking process related to water management, as well as more accurate perspectives on the thinking behind the complex agreements that exist for sharing water resources between our countries. This project would support the Mission's goal of building cooperation on environmental protection.
